Profile

Computer Science co-op student (3.69 GPA) and current Government of Ontario Data Analyst with hands-on experience in Power BI, DAX, Python, SQL, advanced Excel, data validation, QA/UAT, workflow automation, and stakeholder-driven reporting. Experienced in building accessible dashboards, automating business processes, troubleshooting data issues, and translating business requirements into practical technical solutions.

Technical Skills

Data & BI: Power BI, DAX, Excel (PivotTables, lookup functions, structured formulas), data cleaning, validation, reconciliation, KPI dashboards, data visualization, reporting QA
Programming & Databases: Python, SQL, Java, C++, C#, JavaScript, SQL Server, MySQL, MongoDB, REST APIs, database design, data modeling, ETL concepts, data warehousing fundamentals
Engineering & Tools: Git, GitHub, Power Automate, SharePoint, PowerShell, Docker, Linux, D3.js, workflow automation, software testing, regression testing, root-cause analysis, requirements gathering, technical documentation, Agile/Scrum, Microsoft Copilot

Selected Projects

Approval & Reporting Automation Platform | *Power Automate, SharePoint, Microsoft 365, Excel*
- Designed an end-to-end approval workflow that monitors a shared approval distribution list, captures incoming request details, and automatically creates structured SharePoint list records for centralized tracking
- Built automated owner notifications and recurring reporting flows, replacing manual email-based follow-up with searchable request history, consistent status visibility, and more reliable report delivery
- Tested workflow logic and exception scenarios, refined field mapping and process steps, and documented the solution so business users could manage requests from one place

SkyTracker – Airline Reservation & Analytics Platform | *Vue.js, Node.js, Express.js, MongoDB, D3.js, REST APIs*
- Built a database-backed application with REST APIs and MongoDB data flows, then created D3.js dashboards to analyze revenue trends, flight status, and popular routes

Professional Experience

Government of Ontario Aug 2026 – Present
Data Analyst Co-op — Ministry of Public and Business Service Delivery and Procurement (MPBSDP) *Toronto, Ontario*
- Develop, optimize, and maintain enterprise Power BI solutions, including CORM, MSP, and Vulnerability dashboards, leveraging DAX, data modelling, advanced analytics, and interactive visualizations to support data-driven decision-making
- Utilize Python for data scraping, extraction, cleaning, transformation, and analysis, developing scripts to automate data processing and improve reporting efficiency
- Design, develop, and optimize SQL queries using joins, aggregations, and filtering techniques to extract, manipulate, and validate structured datasets for business intelligence and reporting
- Perform comprehensive data validation, quality assurance (QA), and user acceptance testing (UAT), identifying reporting inconsistencies, troubleshooting technical issues, and ensuring data accuracy and reliability
- Collaborate with cross-functional business and technical stakeholders to gather requirements, enhance dashboard functionality, improve accessibility (AODA), and deliver scalable reporting solutions
- Develop automated approval and reporting workflows using Power Automate, SharePoint, Microsoft 365, and advanced Excel functionalities to streamline business processes, minimize manual intervention, and improve operational efficiency

Sky Trend Solutions Jan 2024 – Aug 2026
Technical Analyst *Toronto, Ontario*
- Supported automotive clients including Signature Honda, Airport Mazda of Toronto, and St. Thomas Nissan, resolving production application, server, network, Microsoft 365, and infrastructure issues
- Built Python and PowerShell scripts to automate recurring technical workflows; Microsoft 365 remediation work reduced related tickets from roughly 150 to 4–5 per month
- Investigated 100+ monthly incidents, analyzed patterns and root causes, and supported client-requested software and website changes through requirements clarification, debugging, testing, validation, and deployment

Debittech POS Dec 2021 – Dec 2023
Software Support Analyst *Scarborough, Ontario*
- Supported software used by 900+ retail clients; investigated application and database-connectivity issues, tested fixes, and met SLA targets for 90% of tickets

Education

Ontario Tech University Expected April 2028
B.Sc. Computer Science & Co-op — GPA: 3.69 / 4.0 *Oshawa, Ontario*

Northern College 2020
Diploma, Computer Engineering Technician — GPA: 3.64 / 4.0 *Ontario*
